

# Folding Frog Card

To view all of the stages in the life cycle of the Growling Grass Frog, make up the folding frog card. You will need some double-sided tape (19mm wide if possible) and a pair of scissors or some fast acting paper glue.

If you have downloaded the frog card, you will also need a ruler and a sharp knife to make the cuts shown in red (Step 1). Before glueing or taping, pre-fold the card as shown. Make sure all the folds are square and that the edges meet neatly.

- Turn the frog card over so that the hatched areas marked A, B, C & D are facing up.
- Fold the frog card along the dotted line between A and B.
- Fold the frog card along the dotted line between C and D.
- Turn the frog card over.
- 5a. Holding down the left-hand side, fold the frog card up at the three-quarter point. (Allow the right-hand flap to slide out from underneath.)  
5b.
- 5c.
- Repeat the process for the left-hand side.
- Cut 4 pieces of double-sided tape (19mm square).
- Lift the right-hand flap and place double-sided tape over the hatched areas marked B. (Alternatively, use glue.)
- Remove the upper protective layer from the double-sided tape and press down firmly. Repeat steps 8 & 9 for the left-hand flap and the hatched areas marked C.
- Turn the frog card over.
11. Fold the card back along the top fold line, allowing the top square to pivot back as well.
12. Repeat for the bottom fold line and square.
13. Turn the frog card over again.
- Open out the card by folding back the top and bottom flaps.

# Folding Frog Card

Discover all stages of the Growling Grass Frog's life cycle by opening the folding frog card as shown below.

Instructions for making the card are shown on the previous page.
